

Services Offered

• Communication Systems

We can custom fit a communication system to suit your particular business' needs. We are partnered with some of the biggest VoIP manufacturers in the world.

• Data Hardware Procurement

Through our Global buying network, we have the ability to find the data hardware you need - at substantial cost savings.

• Transport Services

Whether it's a T1 or a full-blown MPLS network, we can get you connected.

COMMUNICATION AND TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS

At Global Communications, we understand that making an investment in your communications infrastructure is making an investment in your company's life line. There are many choices and applications out there that can truly provide your employees with better productivity, and enhance your business' overall productivity as well. With a staff of certified product specialists and certified product engineers, you can be assured that we can help to make your choices easy, and help you make choices that are relevant to your particular business' communications needs – for right now and moving into the future.
